

3DTV Solutions Joins PTC PartnerAdvantage™ Program

3DTV Solutions' expertise connects PTC® ProductView® and PTC Pro/ENGINEER® to the glasses-free 3D World!

France - Paris June 6, 2010

3DTV Solutions, the developer of a unique 3D Software Solution Kit (3D-SDK), announced today that it has joined PTC's PartnerAdvantage™ Program at the Silver Tier. Inclusion in the partner program provides 3DTV Solutions access to a comprehensive suite of integration tools. Acceptance into the program followed a review of 3DTV Solution's 3D-SDK and its ability to enable glasses-free 3D viewing of PTC ProductView and PTC Pro/ENGINEER.

Acceptance in the PartnerAdvantage Program arose from a common goal to enable 3D viewing without the need for additional equipment such as 3D glasses. The vision is shared by PTC's Michael Campbell, senior vice president, Product Management, and 3DTV Solutions.

"We are pleased that PTC views this as an enabler that is important to its customers, and we are delighted to have been included in the PartnerAdvantage Program," stated Jean-Charles Garcia, 3DTV Solutions' CEO.

Andy Barlow, PTC's Senior Director of Business Development, stated, "With the addition of 3DTV Solutions to the PTC PartnerAdvantage Program, ProductView users have a powerful solution to access a new dimension in 3D viewing." He continued, "The partner program is comprised of software providers selected for their expertise. Through our review process, 3DTV Solutions demonstrated its expertise in creating 3D capabilities. The company is a great addition to the program."
